

## SAP BW on HANA: More than a faster Data Base for SAP BW

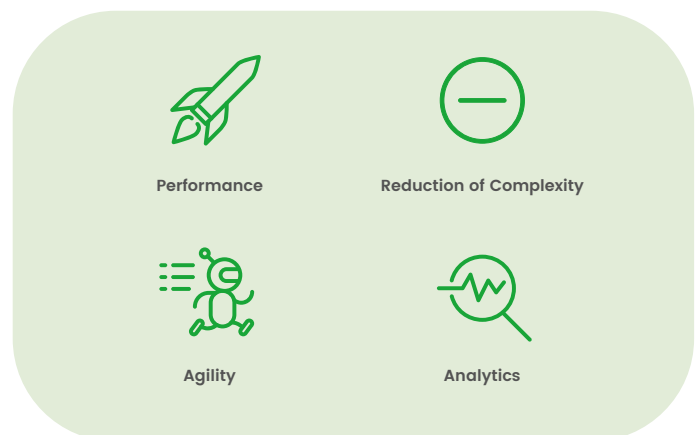

**You are already using SAP BW on HANA or you are planning its utilization?**

**You want to get the full added value out SAP BW on HANA?**

SAP BW on HANA does not only mean BW with SAP HANA as a data base: By now, this has become an innovative In-Memory platform for analytical systems. The functional maturity level and the foreseeable technological stability of the HANA-specific components from SAP BW 7.4 SP11 on provide an extremely reliable basis for strategic investments. In addition, this introduces new efficient levels of data modeling and data analysis with SAP BW.

**s-peers supports you regarding all aspects of a migration to SAP on HANA – as well as with respect to the development of analytical applications and processes:**

- Technical migration to SAP BW on HANA
- Optimization of existing SAP BW objects and processes for SAP HANA
- Conversion of existing data models into HANA-optimized BW objects
- Conceptual design of architecture and development specifications according to LSA++
- Conceptual design of hybrid architectures by utilizing components resp. functions from SAP BW on HANA, SAP HANA Information Models and/or S4/HANA Analytics
- Utilization of ABAP Core Data Services in the context of SAP BW on HANA
- Utilization of SAP HANA Dynamic Tiering

**Precise. Sound. Straightforward.**

## Our Competence for Your BW on HANA:

**We ensure your success with regard to the realization of all advantages and improvements in connection with the utilization of SAP BW on HANA:**

- Increased performance in terms of reporting and data loading through implementation of extensive data operations and complex transformations to SAP HANA
- Considerably reduced latency with regard to data provision – up to Realtime Reporting and Realtime Analytics
- Reduction of the data models' complexity through reduced persistence and a larger number of virtual data accesses
- Increased agility and speed as to the realization of new requirements
- Development of analytical applications beyond the scope of reporting – also by using means from SAP BW on HANA (e. g. HANA Analytics, Predictive Analytics, Text Analysis, Sentiment Analysis and linkage to Big Data)

**s-peers – Your Partner for Successful Business Analytics and Reporting with SAP.**

Integrative and analytical: Our competences and methods enable customers to make better decisions and to optimize their business processes successfully with a long-term effect.

### **Our Services – Comprehensive Consulting**

Utilize the full potential of your data: Increase your added value and secure your enterprise's market advantage successfully.

#### **Strategy**

We define your way to a "Data-Driven Company"

#### **Architecture**

Setup and operation of your analytical ecosystem

#### **Enablement**

Organization of workshops and trainings

#### **Implementation**

Development plus coaching during the setup of analytical scenarios

#### **Support**

Support and further development during Productive Operation / Hypercare

**From Strategy to Support  
– Everything from One Source.**
