# Corporate Reporting – Reporting with Added Value

Are you already able to perform proactive and visionary Corporate Controlling systematically via recipient-specific and management-related Reporting?

OUR expertise sets new benchmarks with regard to your Management Reporting: Our know-how ensures the realization of consistent technological control on the basis of all KPIs which are relevant for and critical to success concerning the mapping of your business models and value-added chains.

We have the practical knowledge to establish standard reporting as well as agile reporting successfully in your enterprise: Based on your specific requirements, we generate the requested reporting mix of Push and Pull – as well as maximum autonomy and mobility with regard to the provision of reports.

Our Technologies for Corporate Reporting:

- SAP SEM-BCS
- SAP BPC (Embedded Model)
- SAP BW-IP
- SAP BI
- SAP BOBI
- graphomate® Add-ons for SAP BO Design Studio (SAP® certified + IBCS® certified)
- HI-Chart® Add-on Chart-me DS for SAP BO Design Studio (SAP® certified + IBCS® certified)

Precise. Sound. Straightforward.

Our Methodology for Corporate Reporting: IBCS® with HICHERT®SUCCESS

Learning from the best!
Our methodology banks on this standard reference established by Prof. Dr.-Ing. Rolf Hichert for efficient business communication in presentations and reports.

HICHERT®SUCCESS represents tried and tested guidelines for the composition of presentations and reports in compliance with the International Business Communication Standards (IBCS®) – from message transport up to the simplification of the way in which results are displayed.

We create the basis for reports which are accurate in substance – and are also easy to understand as well as more easily to prepare.

By standardization …

- … of the data processing in SAP BW and SAP HANA, you get an optimally reliable basis for reports with accurate content,
- … of your organization, methodology, processes and front-end technologies, reports can be prepared and provided more easily,
- … of the report design according to IBCS®, reports become easy to understand.

Your Added Value:
## Our IBCS® Consulting especially provides the following benefits:

Messages of reports are clearly evident	Standardized, exhaustive and non-overlapping structure of contents	Decoration is eliminated in favor of clear information	All values and measurement parameters are defined	Contents are condensed	Reporting errors are eliminated within the scope of the project

From Strategy to Support
– Everything from One Source.
